

SAIPREETHAM VOTARIKARI

AGENTIC AI & ML ENGINEER • GENERATIVE AI DEVELOPER • DATA SCIENTIST

✉ saipreetham.votarikari@gmail.com ☎ 7995768056 📍 Hyderabad, Telangana 📁 Portfolio 🔗 LinkedIn 🏠 GitHub

PROFESSIONAL SUMMARY

Computer Science graduate specializing in Agentic AI and Generative AI, with hands-on experience building multi-agent applications using LangGraph, MCP, RAG, and LLM integrations. Oracle-certified in Agentic AI and trained in Data Science, with a strong foundation in Machine Learning and full-stack development (Python, FastAPI, Next.js). Seeking an AI/ML Engineer role to build reliable, observable AI systems.

EDUCATION

CMR College of Engineering & Technology
Bachelor of Technology in Computer Science and Engineering

11/2021 – 05/2025
Telangana, India

SKILLS

Programming Languages: Python | SQL | JavaScript

Data Science & Analytics: Pandas | NumPy | Matplotlib | Data Preprocessing | Exploratory Data Analysis (EDA) | Feature Engineering | Model Evaluation | Data Visualization

Machine Learning & Deep Learning: Scikit-learn | K-Means Clustering | Hierarchical Clustering | TensorFlow | Keras | PyTorch | Convolutional Neural Networks (CNN)

Generative AI: RAG | LangChain | Prompt Engineering | LLM Integration | FAISS | Hugging Face Embeddings | Groq API | Vector Databases

Agentic AI: LangGraph | MCP (Model Context Protocol) | Multi-Agent Orchestration | Tool/Function Calling | State Management | Context Management

Web & Backend Development: FastAPI | Streamlit | Next.js | React | Tailwind CSS | HTML/CSS | Server-Sent Events (SSE)

Databases: SQLite | Vector Search (FAISS)

Tools & Platforms: Git | GitHub | Docker | LangSmith | API Development | Modular Architecture | Power BI | AWS S3 | Oracle Cloud Infrastructure (OCI)

PROJECTS

My Perplexity — Agentic AI Search Assistant

LangGraph, LangChain, Groq, Tavily, FAISS, Hugging Face Embeddings, FastAPI, Python, Next.js, React, Tailwind CSS, Docker, LangSmith, SQLite, Server-Sent Events (SSE)

- Built an agentic AI search assistant using LangGraph to dynamically route queries across three tool types: web search (Tavily), document RAG (FAISS with Hugging Face embeddings), and a calculator tool.
- Implemented persistent conversation memory using LangGraph's SqliteSaver, ensuring chat history survives server restarts.
- Engineered real-time streaming chat responses using FastAPI and Server-Sent Events (SSE) for a low-latency, interactive user experience.
- Resolved a stale-retriever bug in the RAG pipeline, ensuring uploaded documents were always reflected accurately in real-time answers.
- Containerized the full stack with Docker and integrated LangSmith for end-to-end observability into query routing and tool execution. | [GitHub](#)

Multi-Agent Travel Planner

LangGraph, MCP (Model Context Protocol), Groq, Tavily, AviationStack, FastAPI, Python, SQLite, Docker, LangSmith, HTML/CSS/JavaScript

- Extended an open-source LangGraph travel planner (Supervisor routing, four specialized agents, MCP tools, human-in-the-loop approval).
- Added budget-aware alternatives: over-budget detection triggers a second, targeted Groq LLM call that generates three concrete alternatives (shorter trip, lower-cost stay, cheaper destination).
- Migrated checkpointing from PostgreSQL to SQLite (SqliteSaver), removing the external database dependency and simplifying deployment to a single file.
- Integrated LangSmith for end-to-end tracing of every agent and tool call.
- Containerized the app with Docker Compose as a single service for reproducible local setup. | [GitHub](#)

INTERNSHIP EXPERIENCE

Data Science Intern — AIVariant | 11/2025 – 02/2026

- Cleaned, preprocessed and analyzed 2+ real-world datasets using Python (Pandas, NumPy), using EDA to identify patterns and trends.
- Built and evaluated machine learning models using appropriate performance metrics, improving prediction performance by 15%.
- Applied statistical analysis and created Matplotlib visualizations to summarize findings and support data-driven decisions

CERTIFICATES & ACHIEVEMENTS

Agentic AI Certified Foundations Associate — Oracle (09/2026): Certified in designing AI agents using LangChain and MCP (Model Context Protocol), and building agentic AI solutions on Oracle Cloud Infrastructure (OCI). | [Certificate](#)

Data Science Programme Certification — ExcelR (01/2026): Completed 200+ hours of training in Python, Machine Learning, and Data Analysis, with 3+ real-world projects. | [Certificate](#)

Data Science Internship — AIVariant (02/2026): Completed a 3-month Data Science internship, working on 2+ real-world datasets and improving prediction performance by 15%. | [Certificate](#)

Freshman Code Cup — Azura National Technical Symposium, CMR College: Participated and certified in a national-level coding competition, demonstrating strong programming and problem-solving skills.
